foeldeak – Innovation by Tradition

foeldeak LeatherBell® teamsport

Exercise devices of the foeldeak series professional are something really special. Produced with high-quality workmanship, they leave nothing to be desired and prove their worth daily over a long time. Nearly every sport requires force, stamina and a good condition.

The traditional dumbbell or kettlebell is a simple but extremely efficient training device. Once you've handled a kettlebell and performed the first exercises you are immediately aware of the amazing exercise device you are holding in your hand. The disadvantage hitherto: a classical kettlebell is a heavy iron ball with a handle attached to it. Falling with its high weight to the floor – or worse, onto your foot – during exercise, that's no longer fun. Unlike the foeldeak LeatherBell® teamsport.

The intelligent, multi-layer high-tech structure made of deformable, natural materials – such as several layers of carefully sewn technical cowhide (up to 3 mm thick) – guarantee unconditional safety at absolutely similar flight and throw qualities.

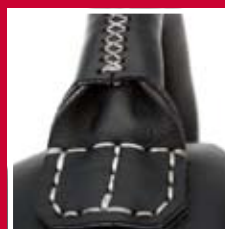

If at home on the third floor or in a holiday hotel, even barefoot on the beach, the LeatherBell® is always with you. Quiet, safe, but effective nonetheless. Available in several weight categories from 4, 8, 12, and 14 kg, as a perfect preparation for every sport.

Please order your LeatherBell® teamsport at Foeldeak, directly!

Top Quality of

foeldeak
PROFESSIONAL SPORTS EQUIPMENT
