# foeldeak Training Dummy *teamsport* made by

Such a training dummy has a hard life. Being thrown around, revolved and lifted countless times, each and every day. And still has to perform as it was the first time. Thus, it needs exceptional material quality to outwear many years.

Foeldeak's standard TrainingDummies *teamsport* were created to cope with this task. From strong leather (1,6mm), precisely sewn and provided with the anatomic correct weight distribution these dolls are exactly the training device that is needed to perfect turns and automate motion sequences.

**This applies for wrestler as well as for judoka, grappler or any other combat sportsmen.**

The TrainingDummy *teamsport* is available with three different versions: four-legged as a so-called „The Bone“ to practice alone or two-some especially, the important turn-around on the floor; with no legs but two arms to practice holds and body-slams for Greco-Roman or as classic slam dummy; with two legs and two arms for freestyle wrestler or other combat sports, where direct contact with hip and legs is permitted.

Each of these three types is available in various sizes and weights. Therefore, there is always an ideal dummy for each body height and level of performance.

**Please order the TrainingDummy *teamsport* at Foeldeak, directly!**

Top Quality of
