Foeldeak – Innovation by Tradition

Foeldeak WrestlingMat teamsport

Even though only one athlete at a time stands on the mat, wrestling is a true team sport. But the team can only win if every single athlete pulls through safe and sound. And over an entire season, hard training included.

The area where everything happens, week by week, is therefore very important: the right sport mat. Either exercise or competition, one thing is absolutely important: the physical health of the athletes. Even a small club budget must be irrelevant in this case. The Foeldeak T class with the foeldeak® T5 or the very light-weight foeldeak® TL are simply ideal. At all times safe protection for the athletes and by all means gentle to the club budget!

The foeldeak® T5 is made of a 5 cm thick robust compound foam coated on top and on the lateral sides with artificial leather; the bottom surface features antislip material or carpet felt. Ideally, for example, for the novel Velcro cover. The 1 x 2 m slabs weigh no less than 17 kg. So they are like set in stone – in every gym.

Contrary, the foeldeak® TL is very light and thus ideal for schools and clubs. It is the lightest mat and at the same time the most inexpensive mat of the Foeldeak product line. The core is made of a 5 cm high polyethylene and PUR sandwich structure, the edge elements of the mat are coated with grey carpet felt. With a weight of the 1 x 2 m mat element of only 5 kg and given the same stability and sturdiness as the T5, this mat can easily be installed and put away afterwards.

Apart from the basic elements, the mat cover plays of course a decisive role in the complete wrestling mat. It consists of bi-laterally PVC-coated 100 % polyester, featuring either the traditional flap-down edge or the modern durable Velcro closure. Thus, the elements remain stable in place without wrinkles nor stumble gaps. foeldeak covers are seamlessly welded and don't have to be glued. They are pollutant and solvent-free, can be kept hygienically clean without effort and have a very long life. Since decades, Foeldeak is with its excellent sports mats supplier no. 1 for league competition and nearly all national and international major events, such as Olympic Games or World Championships.

Order your WrestlingMat foeldeak® T5 and foeldeak® TL directly from Foeldeak!
